***2: Assessment of the implementation of action activities and its results***

***Executive summary of the action***

**Pakistan poverty alleviation Fund** (PPAF) is an apex institution for community-driven development & poverty alleviation. A company set up under section 42 of the Companies Act, 2017. The organization facilitates public-private partnerships that have a mutual goal to achieve social and economic change in Pakistan by addressing the multi-dimensional issues of poverty. Established by the Government of Pakistan as an autonomous not-for-profit company, PPAF began its operations in 2000. Thus far, it is working across 137 districts in the country with 130 partner organizations.

**PPAF** works through CSO that are value-driven and based upon neutral and inclusive models structured specifically to target the poorest and most marginalized regions of Pakistan. In creating these alliances, PPAF focuses on ensuring that these partner organizations are well governed and transparency and accountability remains priority. Through these alliances, PPAF extends support to communities in dire need of improving their infrastructure, health and education facilities. It also helps develop resilience to disasters and improve energy resources. It has an outreach across Pakistan (137 districts), supporting communities to access improved infrastructure, energy, health, education, livelihoods, finance, and develop resilience to disasters. We aim to ensure that our core values of social inclusion, participation, accountability, transparency and stewardship are built into all processes and programs. PPAF has invested in developing the capacities of our 130 implementing partners (civil society organizations), around 120,000 organized community groups, 440,000 community credit groups, 11,800 village organizations, and over 800 union councils to date. With an experience of over a decade, PPAF concludes that local and community-based institutions are key to creating a positive outcome and proving effective approach.

**Farmers Development Organization (FDO)** was established in 1996 as a not for profit and non-governmental public interest organization and "A company setup under section 42 of companies ‘ordinance 1984". FDO is working in Saraiki Region (Southern Punjab), through participatory principles, benefitting hundreds of peasants, women and general communities in the fields of Livelihood, Institutional Development, Emergency Relief, Community Physical Infrastructure, preventing gender based violence and promoting access to justice. The organization has a successful history in designing projects, subsequently through conducting the

assessments of community problems, creating and engaging the local volunteers for implementing and monitoring the projects as an organization struggling to empower the marginalized sections of society and joining hands with government to influence policies in favour of people. Since the past 27 years, it is functioning in Punjab province of Pakistan, under a dynamic Board of Directors consisting on very senior scholars and development professionals.

In response to the devastating floods in Pakistan in August 2023, a project named "Emergency Relief Assistance 2023 for Flood Affected Communities in South and Central Punjab" was initiated by FDO with the support of PPAF. The project focused on three components: area identification, beneficiaries profiling, and distribution of winterized kits and non-food items comprising household items and hygiene kits. The aim was to promote hygiene education and distribute hygiene kits to reduce the risk of waterborne diseases.

Field visits were conducted to select the union councils for the project based on criteria such as population impacted by floods, extremely vulnerable communities, low human development index, and being flood-affected. Two union councils were selected, and community groups were formed, consisting of young, experienced, and dynamic members who would guide others for efficient results. Monitoring visits were conducted to assess the knowledge absorption and health practices of the community groups, which showed positive changes such as handwashing and hygiene practices during menstruation. Based on these improvements, hygiene kits were distributed. Throughout the implementation period, monitoring and follow-up visits were carried out to ensure the project's timeliness, progress and success.

**Goal: To contribute to poverty reduction among flood affected population of Bahawalpur**

**Specific Goal/Objective** of the project is to provide protection assistance to flood- affected targeted households and address their immediate social needs, with a particular focus on vulnerable and marginalized groups, such as women and disabled-headed households during a short-term relief phase.

**Output-1.1: "Enhanced resilience to cope with adverse weather conditions and displacement"**

**Activity 1.1.1 Identification of Beneficiaries and Validation with Community Institutions**

The project's beneficiaries were men and women from rural areas of all ages, including children, youth, women, and elderly people in their 60s and 70s. Religious minority like Christians as well as ethnic minorities like the (Moors, Kotanay, Keehal, and Changar) were persecuted. The recipients were chosen according to three criteria:

- Widows or women-headed households
- People without adequate income
- Those who most impacted by floods

The project, benefited 927 households directly benefited from the distribution of winterized kits and Non-food items comprising hygiene kits and household items. Validation process not only completed by FDO Monitoring team but they are also verified by local community influential individuals but were also validated by the Community Resource Persons (CRPs) of National Rural Support Programme (NRSP).

**Output 1.2 "Increase access to personal hygiene products leading to better to sanitation practices."**

The targeted area is not having the main private hospital in their vicinity and accessibility, that's why union council level BHU was involved to address the importance and need of health and hygiene, also to raise awareness regarding the cleanliness. Resultantly, helping the vulnerable community by preventing from different diseases that may attack them during flooding, harsh weather condition and disruptive climatic pattern overall which is a global issue nowadays in the whole world, so, using the provided platform effectively, we considered this important perspective to be the part of whole programmatic approach.

**Activity 1.2.1 Mobilization and Awareness Sessions**

Total No. of 40 Mobilization and awareness hygiene sessions were conducted during the project period. The details of the sessions are mentioned herein:
Table No. 1 Detail of Hygiene Sessions as follows:

| District | Ucs | Total Sessions | |
|---|---|---|---|
| | | December | January |
| **Bahawalpur** | Jhangra | 15 | 15 |
| **Bahawalpur** | Khair Pur Daha | 05 | 05 |
| **TOTAL:** | | 20 | 20 |

Regarding health and hygiene mobilization sessions, a total of 40 sessions were conducted as part of the project's activity A, focusing on hygiene education and awareness. It is encouraging to see that people are adopting hygienic practices such as nail trimming, handwashing with soap, bathing, and using Maswak for teeth cleaning. Disease rates in the project areas have significantly decreased due to increased awareness. To promote this, our hygiene promoters conducted various activities to raise awareness.

For instance, Cleanliness Day was observed on November 1st 2023 in Basti Jhangra Teba, UC Jhangra. Active Citizen youth group, received a one-day session from FDO and acted as hygiene promoters in district Bahawalpur, FDO encouraged and supported this group in observing Cleanliness Day together. On that day, the youth volunteers visited different houses in the village and started cleaning the garbage. When people saw them cleaning, they joined in and began cleaning themselves.

The group also cleaned the streets of the areas. Although, the primary need in flood-affected areas was to rebuild houses however, the people still showed interest in our health and hygiene work. Female group members were particularly active and used the group activity as a platform to share their problems for the better solutions.
Our female hygiene promoters also discussed the importance of exclusive breastfeeding.

**The sessions primarily covered the following topics:**

- Ensuring access to safe drinking water and water purification methods.
- Emphasizing the importance of handwashing with soap before and after meals.
- Promoting handwashing with soap after defecation.
- Encouraging handwashing with soap and available cleaning material before meal preparation.

- Highlighting the necessity of handwashing with soap available cleaning material before breastfeeding.
- Educating on the benefits of exclusive breastfeeding.
- Emphasizing the importance of regular brushing for oral hygiene.
- Advising on proper nail trimming techniques.
- Promoting personal, household, and surroundings' cleanliness.
- Providing information on precautions to be taken during menses. Minimum Level of Knowledge about Mensural Hygiene Management (MHM) awareness and guidelines shared.
- Educating on the proper disposal of animal dung, household waste, and sanitation practices.
- Raising awareness about diseases such as diarrhea, dysentery, cholera, and malaria that can be prevented through proper personal, household, and surroundings' cleanliness.
- Conducting demonstrations and discussions on the contents of hygiene kits.
- Holding awareness sessions specifically focused on Dengue fever during September.

**Output 1.3 "Enhanced self-esteem and psychological wellbeing of household through the provision of essential non-food items"**

**Activity 1.3.1 *Procurement and Distribution of winterized kits and Non-food items comprising hygiene kits and household items***

Initially, procurement plan was made as per prescribed format and approved from PPAF. Then IFT was generated and tender was published in newspaper, FDO official website & Brightspyre page. Bids were opened in front of committee nominated by Head of programs. Bids opening report, Technical Evaluation sheet, sample evaluation sheet, Bids proceeding report & Comparative Bids Analysis (CBA) were finalized. After review and approval from PPAF, contract was finalized with selected vendor. Delivery of winterized kits and non-food items comprising household items and hygiene kits conducted on the venue mentioned in the contract. Payment was forwarded to finance department after complete delivery and payment was made accordingly. Moreover, the whole process, procurement plan and selection of vendors, contractors and related information has been already shared with PPAF earlier.

**Mr. Parvaz Ansari Program Manager** who was the moderator of the event welcomed the participants and shared the objectives and detailed agenda of the program along with the Introduction of Farmers Development Organization (FDO). Household beneficiaries including women, representatives of civil society, media, political parties, and District Government official attended the event. Proceedings of event started with recitation of the Holy Quran.

**Mr. Aftab Ahmad Peerzada - Secretary Planning and Development South Punjab** graced the inauguration ceremony and distributed the winterized kits and Non-food items comprising hygiene kits and household items, among the flood affected households of District Bahawalpur during the first round of distribution. Under this initiative 927 deserving families received winterized kits and non-food items.

**Initiation of the Program: Ghulam Mustafa,** Chief Executive Officer-Farmers Development Organization, extended a warm welcome to the participants and introduced the Emergency Relief Assistance project aimed at supporting communities affected by the 2023 floods in south and central Punjab**.** He explained that FDO will serve as the implementing partner of Pakistan Poverty Alleviation Fund (PPAF), which will provide financial assistance for this project. Mr. Mustafa detailed out that the initiative will focus on two affected Union Councils of Jhangra and Khair Pur Daha in Tehsil Ahmad Pur East of district Bahawalpur.

**Mr. Mustafa** elaborated the objectives of emergency relief assistance through provision of winterised kits and Non-food items comprising hygiene kits and household items to ensure protection of the affected communities during the relief phase. Highlighting the needs, he explained as when evacuating homes, many people left critical household items and personal hygiene products behind. The project would thus provide the essential items to households to meet immediate needs and prevent the spread of illness and disease. As winter was approaching, the project would equip households with basic winter clothing, mattresses, quilts, and mats to ensure well-being of households during the challenging time.

Promotion of human rights (strengthening the communities, good governance and environmental sustainability such as Climate change is linked with the glacier melting rate causing more effect on disastrous situation such as Flooding, destruction of resources ultimately contributing to the increased poverty ratio within the marginalized communities.

Life skills session and economic balance strategies are important for the flood affected people, hence this is all about addressing their issues. Sessions on LIFE SKILLS at improving participation of Flood Affected, people with disabilities and transgender in economic and skill enhanced processes by influencing supply and demand sides of Markets. It endeavours to involve and capacitate Flood Affected Peoples in conducting economic condition with civil society groups, Markets Committees companies' media, and government officials from Government Line Agencies (GLAs) and engage with Social Welfare Also District Govt. on their issues and demands and influencing processes policies regarding Climate Change in world.

**Mr Wasim Imtiaz, Project Coordinator**, presented the project brief he also said that articles of constitution from 8 to 38 ensured the fundamental rights of citizens but unfortunately in Pakistan all articles related to human rights are not being respected. He explained that until women will not participate for using their political and human rights, and raise their voice for their basic rights, their rights would be violated in each context. He stated that previous parliament passed many bills for the rights of women and in this regard commission on status of women was passed to secure women and their rights, afterwards two short videos of empowered Women EX-MNA's were shown to the beneficiaries (to motivate them and enhance the Women Empowerment impact) having a humble background from Pakistan were shown highlighting their struggle for Flood affected and the work done by them for uplifting their marginalized communities as follows:

1-EX-MNA Saima Akhtar Bharwana from Shorkot

2-EX-MNA Ghulam Bibi Bharwana from Jhang

The stories were presented to the communities via social media to motivate the women beneficiaries regarding their social rights and awareness about good governance.

**Moreover, (Secretary Planning and Development) (Mr. Aftab Ahmad Peerzada)** Sb stressed that society should change the behaviours and civil society should play its role to eradicate climate change and also provided opportunity for beneficiaries of flood affected regarding future and economic activities.

During the event, social distancing and other SOPs strictly followed for prevention of ERA Project at the end of the event 44 Winterized kits and Non-food items comprising hygiene kits and household items were distributed among the Flood affected Peoples Mr (Secretary Planning

and Development) (Mr. Aftab Ahmad Peerzada) and Mr. Ghulam Mustafa (CEO FDO) has distributed the kits.

During the reporting period, a total of 927 winterized kits and 927 Non-food items comprising hygiene kits and household items were distributed to the same 927 households, 927 Winterized kits + 927 Non-food items comprising hygiene kits and household items =1,854). These packs were given to the same individuals who had previously received winterized kits and non-food items comprising hygiene kits and household items. It is estimated that these kits directly benefitted over 6,489 individuals, assuming an average of 7 family members per family.

The **identification process** was carried out through a basic needs assessment, taking into consideration the following agreed criteria:

- Families severely impacted by the flood,
- Extremely vulnerable families including those headed by women, widows, orphans, disabled individuals and neglected groups.
- Organization ignored and remained left due to criteria by other organization.

Before the distribution took place, our hygiene promoters field staff conducted visits to identify deserving families. These families were then given tokens one day prior to the distribution. The villages in which we operated were significantly affected by the flood, making it challenging to determine who should receive assistance. A consideration was made for the level of comparative vulnerability when making these decisions. For instance, if an entire village was wiped out by the flood, it was difficult to determine who deserved assistance and who did not. To ensure a respectful, peaceful, and well-organized distribution process, tokens were issued prior to the distribution by our hygiene promoters. During the distribution, details were recorded on a specific sheet, including the receiver's particulars, as well as their signatures or thumbprints. The same process was followed during the distribution of the resupply packs.

## 3. Results and Activities

**What has your organisation or any actor involved in the Action learned from the Action and how has this learning (including evidence from monitoring and evaluations) been utilised and disseminated?**

- (Secretary Planning and Development) (Mr. Aftab Ahmad Peerzada) Sb stressed that society should change the behaviours and civil society should play its role to eradicate climate change and also provided opportunity for beneficiaries of flood affected regarding future and economic activities.

- Government officials, especially from the social welfare department, as well as representatives from various NGOs, visited to observe the FDO's activities. The field staff also actively participated in UNOCHA/PDMA coordination meetings regarding WASH (water, sanitation, and hygiene) and shared their work.

- Evidence from monitoring and evaluations is already shared included MOVs, Media coverage, Pictures attached and Receiving's sheets/Attendance of the activity.

**Describe if the action will continue after the support from the PPAF has ended. Are there any follow up activities envisaged? What will ensure the sustainability of the action?**

- FDO partnered with district-level local Community Based Organizations (CBOs) and Community Resource Person (CRPs) of National Rural Support Programme (NRSP) to maintain their engagement with these groups once our activities came to an end, and communicated to the community that this awareness campaign was only a short-term effort. FDO plans to uphold its collaboration with these Beneficiaries by working together on upcoming initiatives.

- FDO partnered with district-level local Community Based Organizations (CBOs) and Community Resource Person (CRPs) of National Rural Support Programme (NRSP) to maintain their engagement with these groups once our activities came to an end, and communicated to the community that this awareness campaign was only a short-term effort. FDO plans to uphold its collaboration with these Beneficiaries by working together on upcoming initiatives.

**Where relevant, include any update to the self-evaluation questionnaire on SEA-H and related list of measures undertaken to improve the SEA-H policy within the organization.**

The organizational SEA-H policy is already up to the mark and meets the advance level protocols, code of conduct, criteria and measures, however, the basic standards of SEA-H are considered with prime and immediate attention with zero tolerance factor at each level to protect the rights and dignity of each individual, including self-evaluation to the project staff and across each person who interacted with the beneficiaries and other stakeholders till the completion of the activity, HR unit frequently keep up strong follow-ups to ensure the policy implementation in a transparent manner.

Table No. 2 Detail of Kits Distributed

| District | Tehsil / Taluka | Umion Council | Kits Details | Kits Distributed in January |
|---|---|---|---|---|
| **Bahawalpur** | Ahmad East | Kher Pur Daha & Jhangra | Non-food items comprising hygiene kits and household items | 927 |
| **Bahawalpur** | Ahmad East | Kher Pur Daha & Jhangra | Winterised Kits | 927 |

In an effort to promote a sense of ownership and inclusion, were given Winterised Kits and Non-food items comprising hygiene kits and household items specifically handed over to women. This was done to address the commonly overlooked issue of women being neglected in the distribution of relief goods. By prioritizing women in the distribution process, it was hoped that this would help improve their overall experience and access to necessary items. FDO made a conscious effort to focus on including women throughout the entire project. Both male and female groups were formed, despite the fact that the number of male beneficiaries outnumbered the female beneficiaries. Despite this, hygiene Winterise Kits and resupply packs were still given to women. To ensure this, male members were requested to send their female family members to receive the hygiene and Winterise kits.

***Detail of daily distributed kits attached*. This should not show in the table of contents.**

## 5. Partner Organisation and Community Institutions

### 5.1 ***Coordination and Liaison Building:***

The FDO Bahawalpur office team has maintained close coordination with the District Government Bahawalpur office throughout the project period. Several meetings were conducted with the GLAs Bahawalpur office staff to share work and establish effective coordination. The logistics team also had regular meetings with the PPAF logistics team. Additionally, the FDO team worked closely with other local relief and development agencies to achieve efficient results. Government officials, especially from the social welfare department, as well as representatives from various NGOs, visited to observe the FDO's activities. The field staff also actively participated in UNOCHA/PDMA coordination meetings regarding WASH (water, sanitation, and hygiene) and shared their work.

Furthermore, the FDO actively engaged in various meetings and networks. This includes participating in PDMA/UNOCHA cluster meetings at the district level, which have been conducted by PDMA since December. They also attended the National Humanitarian Network meeting in Bahawalpur and joined the district-level network of NGOs known as the Bahawalpur Civil Society Network. Additionally, the FDO attended the Bahawalpur Child Rights Network meeting, where they shared their work alongside 15 other NGOs and associations.

- Allaha Ditta Basti Jhabail Uc Khair Pur Daha

***Monitoring Visits*:**

Our project team undertook monitoring visits throughout the project which helped significantly in obtaining the first-hand responses of stakeholders. The Team from FDO' national office also went into project specific areas to assess the project progress. The progress was assessed through meetings with group members. These meetings were conducted between FDO teams, hygiene promoters and LRPs community members. FDO joint monitoring mission also conducted field visits to project districts to see the level of Affected Peoples' development in understanding and their level of absorbing Health & hygiene education and to see the progress of the project. Observations of hygiene promoters and FDO team also helped a lot in assessment. Hygiene Promoters were frequently meeting with the groups. They observed positive changes in their attitude regarding cleanliness. Meetings were also held between hygiene promoters of FDO and psychosocial teams of FDO to build coordination between them. The doctors of the health supported BHUs in different project implementation areas also helped a lot. The engineers of FDO also remained in touch with our teams of hygiene promoters. Officials from PPAF visited us to see the Non-food items comprising hygiene kits and household items and Winterized kits.

FDO team regularly undertook monitoring visits to project specific areas. Coordinator and Programme along with FDO National team members visited the project districts to monitor the project progress. This team found project progress up to satisfactory level and appreciated the process for identification of target communities and distribution of Non-food items comprising hygiene kits and household items in an appropriate way.

# PPAF,FDO Contribute to positive societal change,Secretary P&D

**Multan;**

Its heartening to see the government of pakistan ,PPAF,and FDO providing assistance to flood victims in Bahawalpur.The Disrtibution of NFI kits for winter use is crucial,and efforts by social organizations like PPAF and FDO, contributes to positive societal change.The focus on rebuilding infrastrucure damaged by the floods is also essential for long-term stability.It will be helpful in reducing to a considerable extent. These views were expressed by Secretary Planning and Development South Punjab Mr. Aftab Ahmed Pirzada while addressing the ceremony of distribution of NFI Kits for flood victims.It should be clear that the necessary items related to winter use were distributed amongst flood victims in the said ceremony.Mr.Aftab Pirzada further said that ,this type of good initiative of social Organizations like PPAF and FDO is an important step towards positive change in the society.Now this is need of time.He said that a large number of infrastructure had been affected due to floods ,including canal,local bridges,roads etc.Speaking at the ceremony ,Chief Executive FDO Mr. Ghulam Mustafa said that FDO has always talked about pisitive change in the society.In any emergency FDO,not only helped the affected people immediately but also to make such communities stable and make them prepared to cope with the emergency situation.Today's programme is proof that FDO is always with its people.Mr.Ghulam Mustafa informed that necessary items related to winter are going to be distrubted amngst one thousand families.

**Winterized Kit Packaging ERA Project**

**Non-food items comprising hygiene kits and household items Box in good Packing is stored at the venue in district Bahawalpur**

### 6.1 Problems Encountered /Challenges and Lessons Learned

It is of course a challenge to bring change in the attitude and behaviour of the people. People have been doing unhealthy practices since many years out of ignorance and/or negligence and laziness. For example, people in these areas openly used shaving blades without thinking that this practice might cause some serious disease like hepatitis. But we remained successful in bringing change in the attitude and behaviour of the people.

FDO has history of mobilization in these districts and has been running a range of programs in these districts. We also have support from our trained friend organizations, volunteers and groups in these districts. Overall, we did not face any significant problem except a few minor things. We successfully distributed the hygiene kits to those most in need, and through hygiene classes our teams of hygiene promoters were successful in bringing change in the attitude and behaviour of the people regarding health and hygiene during the project period. Nevertheless, some problems faced during the project were:

- We had been facing issues regarding time limitations and carrying hygiene Winterize kits and in far off rural areas. It was faced from May to onwards. It was unavoidable but we did our work successfully.
- The number of hygiene Winterize kits proved far insufficient in relation to the needs and number of affected families.
- Our hygiene promoters would have benefitted from more training sessions on the health and hygiene awareness.
- Working in a very cold weather during December & January was not an easy job. To go for conducting hygiene sessions, token distribution and then distribution of Non-food items comprising hygiene kits and household items along with the Winterise kits during such a cold weather was not less than a challenge.

**6.2 *Success Stories***

**Success Story-1**

**Wound or Injuries Dressing Practices of Village, Basti Teba Jhangra, Shared by Mr. Fiyaz Hussain**

In our small village, we had a peculiar and concerning practice when it came to dressing wounds. Our strange and worrisome wound-dressing custom from our habit of covering our wounds with tattered, old clothes. We had no idea how harmful this seemingly harmless custom could be until we attended enlightening hygiene sessions that we realized the grave consequences that could arise from this method of wound dressing.

These sessions opened our eyes to the significance of wound care and the perils associated with the use of filthy materials by these sessions. We learned that despite their convenient availability and using worn-out, shoddy clothing as bandages could, in fact, increase the risk of infections and other problems. As we had always believed we were providing the necessary care by simply covering the wounds. Determined to break free from this misguided practice, we began searching alternative options for proper wound dressing. Alhamdulillah, we discovered a nearby dispensary that provided the vital medical assistance we required - and the best part? It was completely free of charge.

With newfound knowledge and access to the dispensary, a paradigm shift occurred within our community. We no longer relied on the precarious use of old and shabby clothes also welcomed the professional care offered by dispensary and we'll continue visit and will share this knowledge with others too in a relatives and nearby villagers. The transformation was remarkable, as the abundance of clean supplies and expertise at our disposal ensured that our wounds were treated safely and effectively. Today, our village serves as a shining example of the good knowledge and access to healthcare. By discarding our outdated and potentially harmful practices, we have improved the overall well-being of our community.

In conclusion, our journey from using old and shabby clothes for wound dressing to seeking proper care at a nearby dispensary has been transformative. We have not only discovered the importance of hygiene in wound care but also the need to prioritize access to quality healthcare. This success story serves as a reminder that change is possible, and with the right information and resources, we can ensure a healthier and brighter future for ourselves and generations to come.

**Success Story-2**

**Mishandling the home waste, Garbage and unhygienic practices of caretaking the Animals. Shared by, Sadique Abbasi and Muhammad Muneer, Basti Jhabail Dad Potra, UC Jhangra.**

**Practice-1** We used to carelessly throw our home trash all over our living area in the past, not really understanding the repercussions.

**Pratice-2** We used to comfortably sleep in close proximity to the cattle in our humble abode. There was an abundance of animal dung scattered around our humble **Charpais** (is a traditional woven bed used across South Asia. The name charpai is a compound of char "four" and pay "footed". Regional variations are found in Afghanistan, Pakistan and in India),

However, after thoroughly attending informative hygiene sessions, we observed that our helpless kids would frequently pick food from the jumbled pile, thus exposing themselves to illnesses like dysentery and diarrhea. Unfortunately, we were unaware that their repeated illnesses were primarily caused by this careless behavior. Even though we saw our kids participating in this risky behavior, we naively downplayed its seriousness, blaming it on our own ignorance and indifference. Neglecting to take any action, we callously neglected to dispose of the garbage outside our home, demonstrating a blatant lack of care. However, our negligence and ignorance finally came to an end after participating in several informative hygiene sessions.
We were also enlightened about the threats associated with this longstanding practice of which we didn't care while care taking the animals. It became evident that allowing animal dung to accumulate invites a host of troublesome insects, relentless mosquitoes, and bothersome bees. These pests are not to be trifled with, as they possess the ability to inflict painful bites. Moreover, the bees, known for their tendency to perch on various edibles, have the audacity to transmit harmful germs, thereby posing a grave risk to our well-being.

During these sessions, we were enlightened about the paramount necessity of designating a specific garbage point where all household waste could be deposited and how we can save ourselves, elders, children from good hygiene practices. Henceforth, we resolved to establish a proper garbage point and dutifully discard our waste there and we also took immediate action

the following day, swiftly relocating our **Charpais** further away from the animals or picked all from the shelters.

As a result, our children and elders are now shielded from the dangers they faced before in the results of disease and long-time illness, ultimately securing their well-being and preserving their health. We also assure that we'll continue these practices.

**Personal Story, Shared by: Mr. Allah Ditta, Basti Jhulan, UC Khair Pur Daha**

I did not prioritize dental hygiene and neglected to clean my teeth on a regular basis and didn't maintain good personal hygiene by regularly taking baths and wearing neat and clean clothes.

During hygiene sessions, I learned about the importance of regular teeth cleaning maintaining the personal hygiene. Unfortunately, due to limited resources I did not have access to dental supplies such as toothpaste, toothbrush, or dental tonic initially. As a result, I resorted to using my finger to clean my teeth in the mornings.

Fortunately, my situation improved when I received a hygiene kit that included dental supplies. Among the items was den tonic tooth powder, which became an essential part of my dental care routine. Now, I make sure to clean my teeth with den-tonic (teeth cleaning powder) daily. The refreshing sensation and cleanliness I feel after using den-tonic is truly remarkable. Now I used it regularly, and as soon as I finish my daily tasks, the first thing I do is clean my teeth. This hygiene campaign and sessions has significantly impacted my personal life, as well as the hygiene standards in my household and I think others surroundings people are also following it. I would like to say thank you for increasing our knowledge and providing us supplies through these we improved our daily hygiene practices.

## FDO'S Exit Strategy

FDO partnered with district-level local Community Based Organizations (CBOs) and Community Resource Person (CRPs) of National Rural Support Programme (NRSP) to maintain their engagement with these groups once our activities came to an end, and communicated to the community that this awareness campaign was only a short-term effort. FDO plans to uphold its collaboration with these Beneficiaries by working together on upcoming initiatives.

**Location of Records, Accounting and Supporting Documents**

| Sr. # | Description | Location of Record |
|---|---|---|
| **1** | Survey forms for identification of households | FDO Central office (Program Department) |
